

Before Viewing	Statement	After Viewing
Agree/Disagree	Every body cell has all of your DNA. In other words, your eyeball cells, toe cells and liver cells all have the SAME DNA.	Agree/Disagree
Evidence:		Evidence:
Agree/Disagree	Genes contain the instructions for building everything the body needs, like DNA, proteins and lipids.	Agree/Disagree
Evidence:		Evidence:
Agree/Disagree	DNA is made up of chromosomes.	Agree/Disagree
Evidence:		Evidence:
Agree/Disagree	The more advanced an organism is, the more chromosomes it has.	Agree/Disagree
Evidence:		Evidence:
Agree/Disagree	The reason that you look like your brothers, sisters & parents is because you contain all of the DNA from both your parents.	Agree/Disagree
Evidence:		Evidence:

Before viewing the Tour of the Basics, Close your eyes and think about DNA in your body. Now, open your eyes and draw and label what you saw. Make your DNA drawing as detailed as possible. Label all the parts you are able.
